PROFILE

I am a graduate of Informatics Engineering from the Indonesian Institute of Technology (ITI) with a strong interest and focus in IT Infrastructure, Platform Engineering, System Administration, and DevOps. I am very enthusiastic about collaborating with development and operations teams in building reliable, automated, and easily scalable systems to support service productivity and stability.

PROJECTS

Laboratory Assistant 07/2022 – 08/2025

Indonesian Institute of Technology - Informatics Engineering

- Supervising an average of 20 students per session in Operating Systems, Computer Networks, and Basic Python Programming courses.
- Providing practical assistance, concept demonstrations, and technical problem-solving support.
- Developing practical materials and helping students understand the application of theory to practice.

Infrastructure and DevOps 04/2025 – 10/2025

- Server cluster design using Kubernetes and deployment automation with Bash & Ansible.
- Monitoring system creation using Prometheus & Grafana.
- Currently being prepared for implementation in the campus environment.

IoT integration (GCP + Flutter) 10/2024 – 01/2025

- Creating an IoT data pipeline in GCP to connect smart home devices with Flutter applications.
- Developing a simple mobile interface for real-time device control.

Server Automation via Mobile

- Designing the backend with Go & Bash to control the server service without SSH.
- Integrating the backend with the Flutter mobile application as a control interface.

EDUCATION

Indonesian Institute of Technology 09/2021 – 09/2025

Informatics Engineering

GPA : 3,56

CERTIFICATES

FGA CCNA Digitalent

The British Institute
English for Business

Alibaba Cloud Certification

HARD SKILLS

- Infrastructure and DevOps

- Monitoring & Logging

- Cloud Platforms

- Programming Languages

- Automation

- Mobile Development
